

Specification of Utility Patent Application of EVA DE LUCA for
Personal Denture Remover

CLAIM

What I claim as my invention is a personal denture remover which can be used with ease by a denture user to self-remove a denture, comprising an article of material, such as metal or plastic, shaped or bent into a loop for the insertion of a user's finger at one end and a hook at the other end to be inserted over user's denture(s) for removal from user's mouth.
